

DATA PRIVACY AND GDPR

Our Services

Intellegant
smart data solutions

who we are

Our mission is to provide smart data and compliance solutions.

What makes Intellegant unique is our mastery of the entire data analytics journey. We pride ourselves on not losing sight of the big picture of business realities, and back that up with deep experience in the intersection of technology and business. Being based in Brussels, Belgium, and having a close familiarity with the EU regulation scene is the final piece of the full-service package.

our expertise

Intellegant is a technology integrator.

We strive to serve the needs of the mid-cap customer from our base here in Brussels, which gives us a key advantage to consult on EU regulations and compliance, with a particular focus on data privacy (GDPR), data integrity and data security. Our multidisciplinary team has extensive experience with the medical industry, a particularly strong background for handling today's sensitive data issues.

how we can help you

Customers, clients and regulators are all increasingly expecting ground-up, fully integrated commitment to data privacy, security, and integrity. Intellegant's customizable approach starts with these principles, and provides expert resources to evaluate and remediate your firm's compliance and design.

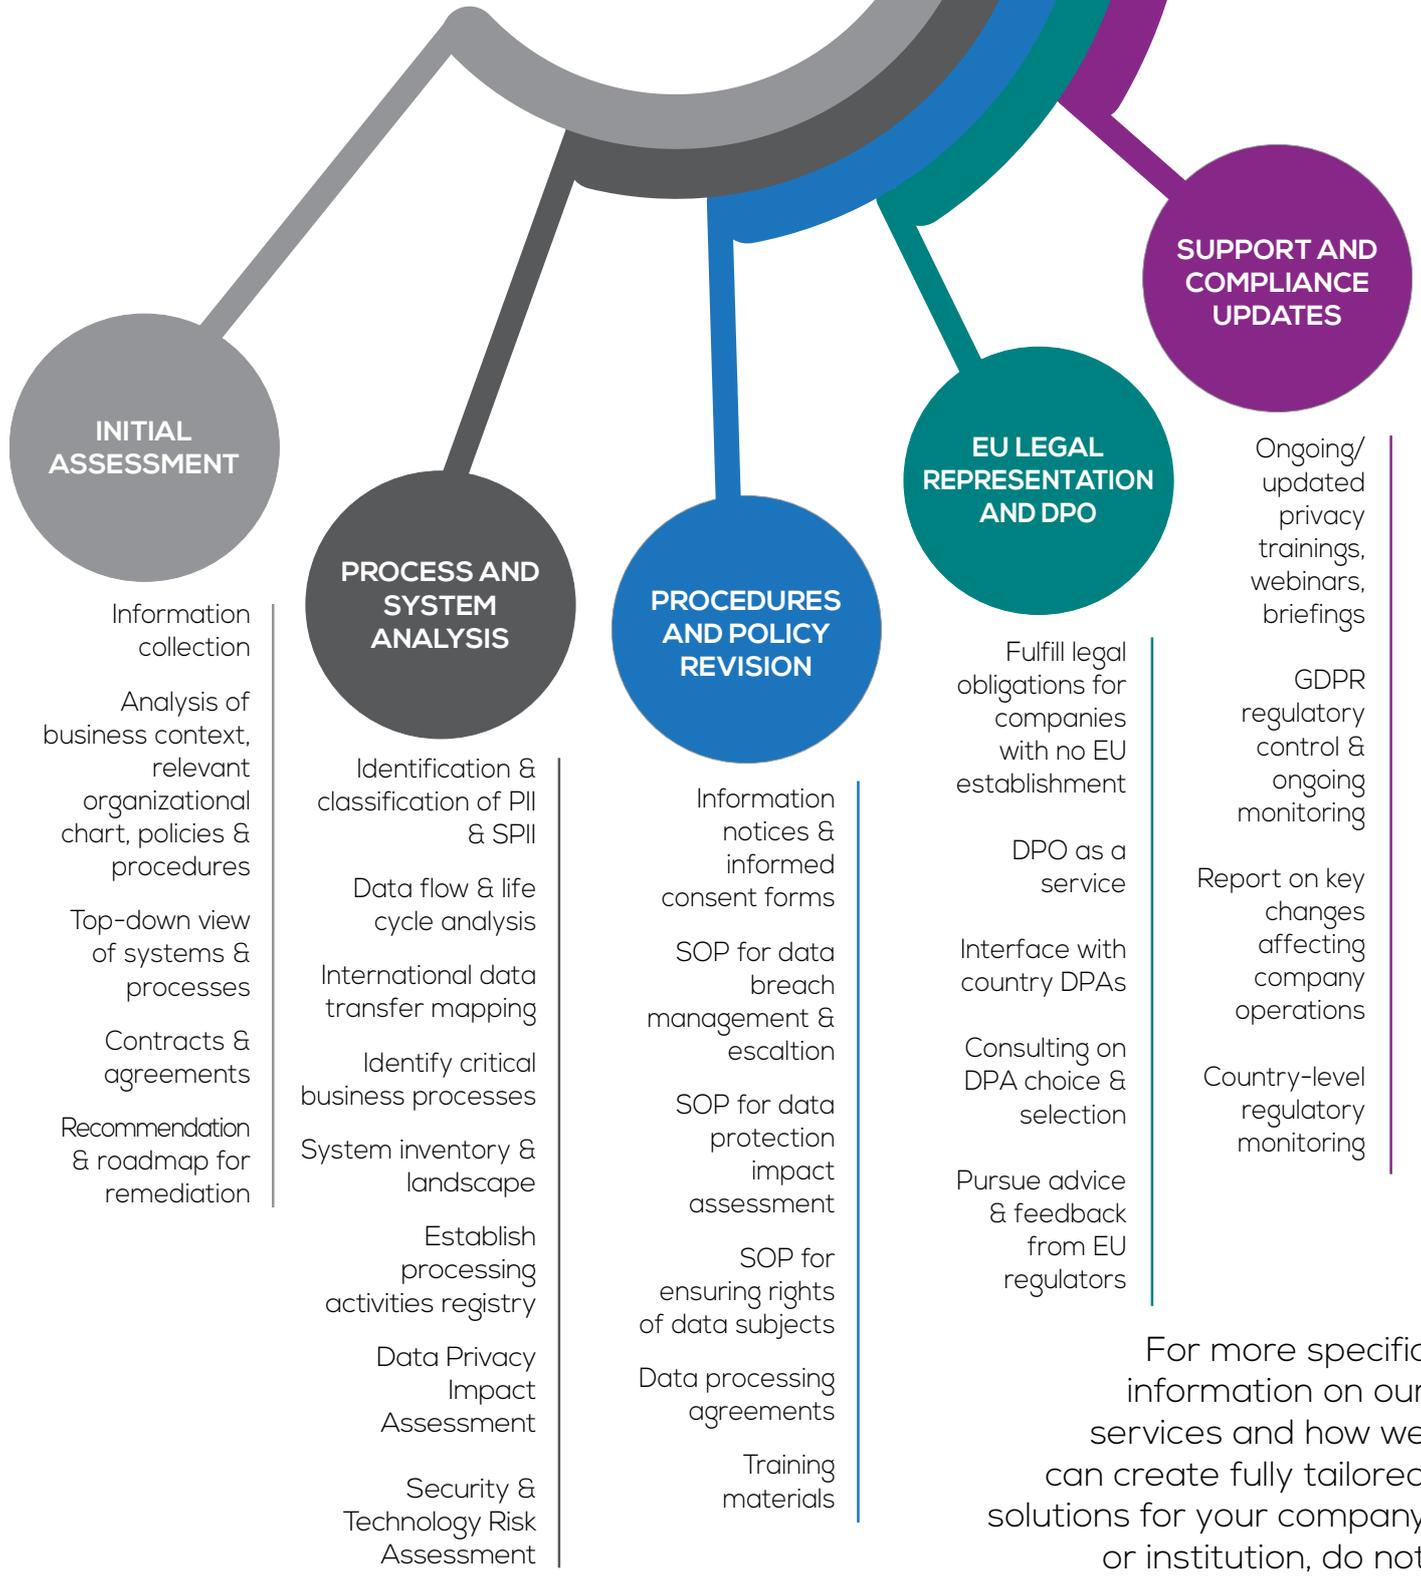

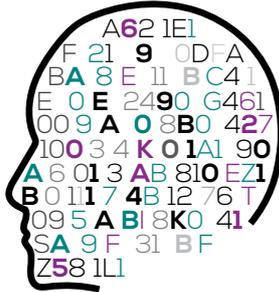

We handle all aspects of the compliance implementation journey, from initial diagnosis to ongoing DPO-as-a-service once you're compliant.

our services

Underpinning everything:

DATA GOVERNANCE

Defining ownership, accountability, roles, and responsibilities around critical business processes and systems.
